Scientific Evidence.

Baron Lietig in his celebrated work on Animal Chemistry says: "An Artificial Digestive
Fluid, analogous to the Gastric Juice, may be
readily prepared from the nuccous membrane of
the stomach of the Calf, in which various artieles of food, as meat and eggs, will be softened,

as they would be in the human stomach."
Dr. Combe, in his valuable writings on the

changed and digested, just in the same manner as they would be in the human stomach.

Dr. Combe, in his valuable writings on the Physiology of Digestion, observes that a diminution of the due quantity of the Gastric Juice is a prominent and all-prevailing cause of Dypepensis; and he states that a distinguished professor of medicine in London, who was severely afflicted with this complaint, finding every thing else to fail; had recourse to the Gastric Juice obtained from the stomache of living animals, which proved completely successful.

Professor Dunglison, of the Jefferson College, Philadelphis, in his great work on Human Physiology, devotes more than fifty pages to an examination of this subject. His experiments with Dr. Beaumont, on the Gastric Juice obtained from the living human stomach and from animale, are well known. In all cases, he says, 'digestion occurred as perfectly in the artificial se in the natural digestionas.'

Dr. Houghton's Pepsin has produced the most marvelous effects in curing cases of Debility, Emsciation, Nervous Decline and Dyspeptic Consumption It is impossible to give the details of cases in the limits of this advertisement; but authenticated certificates have been given of more than two hundred remarkable cures, in Philadelphis, New York and Boaton slone—These were nearly all despersic cases, and the cures were not only rapid and wonderful, but permanent.
